DETAILED ACTION

1. Claims 8-14 are pending for the examination.

RCE STATUS

2. The request filed on 2/15/07 for Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application is acceptable and a RCE has been established. An action on the RCE follows.

Claim Objections

3. Claim 8-14 objected for following reasons.

Claims 9-14 are objected as being dependent on claims which were cancelled before. It is not clear which claims they really need to depend from and which limitations are they further limiting.

Corrections are required.

Claim Rejections - 35 U.S.C. § 112

4. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-14 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9, is confusing and unclear. It is not clear which claim, claim 9 should really depend upon since claim 1 is a cancelled claim.

Claim Rejections - 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if

Art Unit: 2627

the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 8 is rejected under 35 U.S.C. § 102(e) as being anticipated by Ariyoshi et al., US. patent 6,918,130 (hereafter Ariyoshi).

As to claim 8, Ariyoshi discloses the invention as claimed [see Figs. 45-47] including a turntable and an additional means, comprising:

a turntable for supporting and rotating said information carrier; and

[an] additional means for applying and end load on said outer area of said information carrier for setting a predetermined height difference between said inner area and said outer area, said predetermined height difference being greater than a maximum initial height difference occurring in a circular information carrier [col. 20, line 48 to col. 22, line 35].

6. A search based on the best understanding of the claims has been made to find the most pertinent art, but no statement about invention will be appropriate at this time regarding the allowableness of claims 9-14 and no art rejection will be made in this office action regarding the claims 9-14, due to the speculation required to interpret the claims because of their indefiniteness under 35 U.S.C. 112, 1st and 2nd paragraphs as noted above (see *In re Steele*, 134 USPQ 292).

7. Applicant's arguments with respect to above claims 8-14 have been considered but are moot in view of the new grounds of rejection.

Possible Allowable Subject Matter

8. Figure 3 may have allowable subject matter if all details are claimed. This is subject to further search and consideration.
